Questions

- Mobile, Tablet and PC - What to target first?
- Will all have same feature set?
- Will we have Groups? (how are these organized? by product?)
- How is this site monitored? (Will someone monitor forums? Should all users be able to message Groups? (if they exist) Or when I get a certain tier ?)
- Should a user be able to share their profile through social media?
- What else should a user be able to do with social media?
- Do admins get profiles too?
