# AZUKI: TV PLATFORM

ENSEMBLE UX . WIREFRAMES . DECEMBER 16, 2013

TV APPLICATION

This document highlights the changes to the information architecture for the TV application vs. the previous tablet and phone applications. Also illustrated are a couple different flows of how the sections interact with each other and how the user can navigate within it using the D-pad.

This is meant for high-level discussions of navigation. The details within the wireframes will be determined after.
