INTRO

This document is to serve as a style guide for Wired Magazine's iPhone designs. There are comps provided to show how it may look like, then stripped down wireframes showing more details about sizing, fonts and colours (if any).

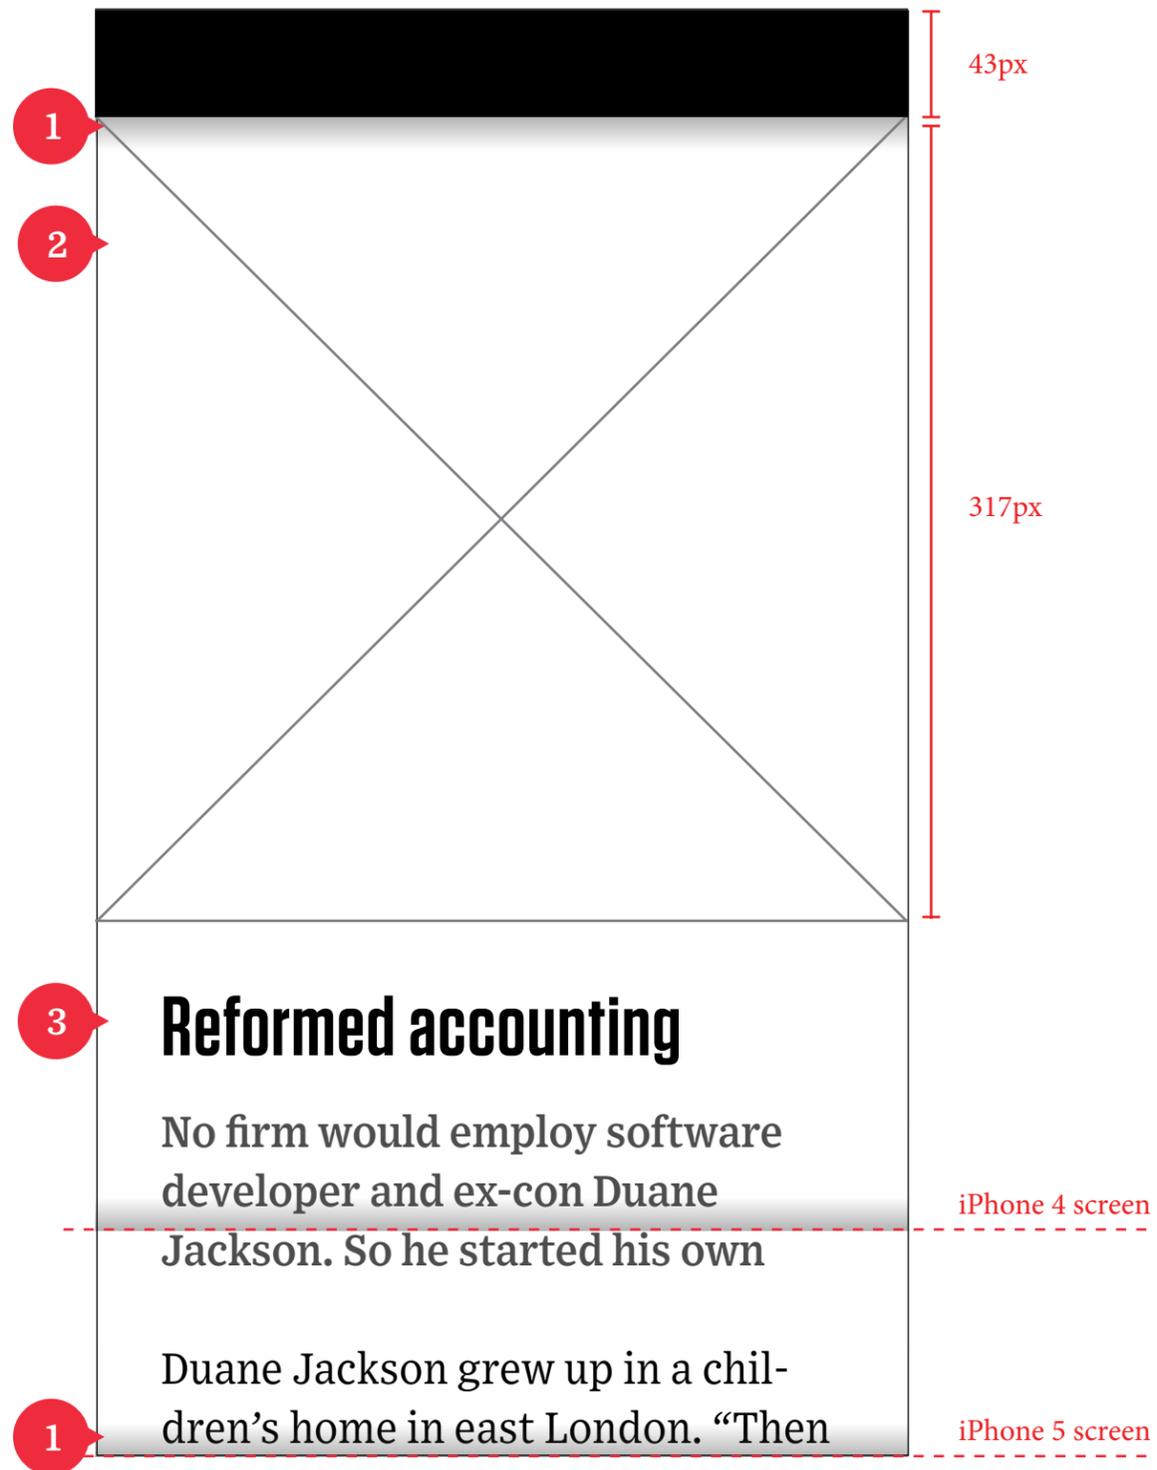

Detailed annotations on how the interactions work are provided as well.

REVISIONS

#	Date	Notes	Revisioner
1.0	Aug 1, 2013	This revision has one template layout and the main navigation component.	Michelle Ngai michellen@ensemble.com
2.0	Aug 9, 2013	This revision has been updated to include all templates/components.	Michelle Ngai michellen@ensemble.com

(1.0)

**NOTES**

1 Gradient overlay mask above image.

2 Article image: 320px x 317px. When clicked, it goes to the Image Gallery Template (pg. #18).

3 Title:
Tungsten Semibold
33pt
Leading: 28.35pt

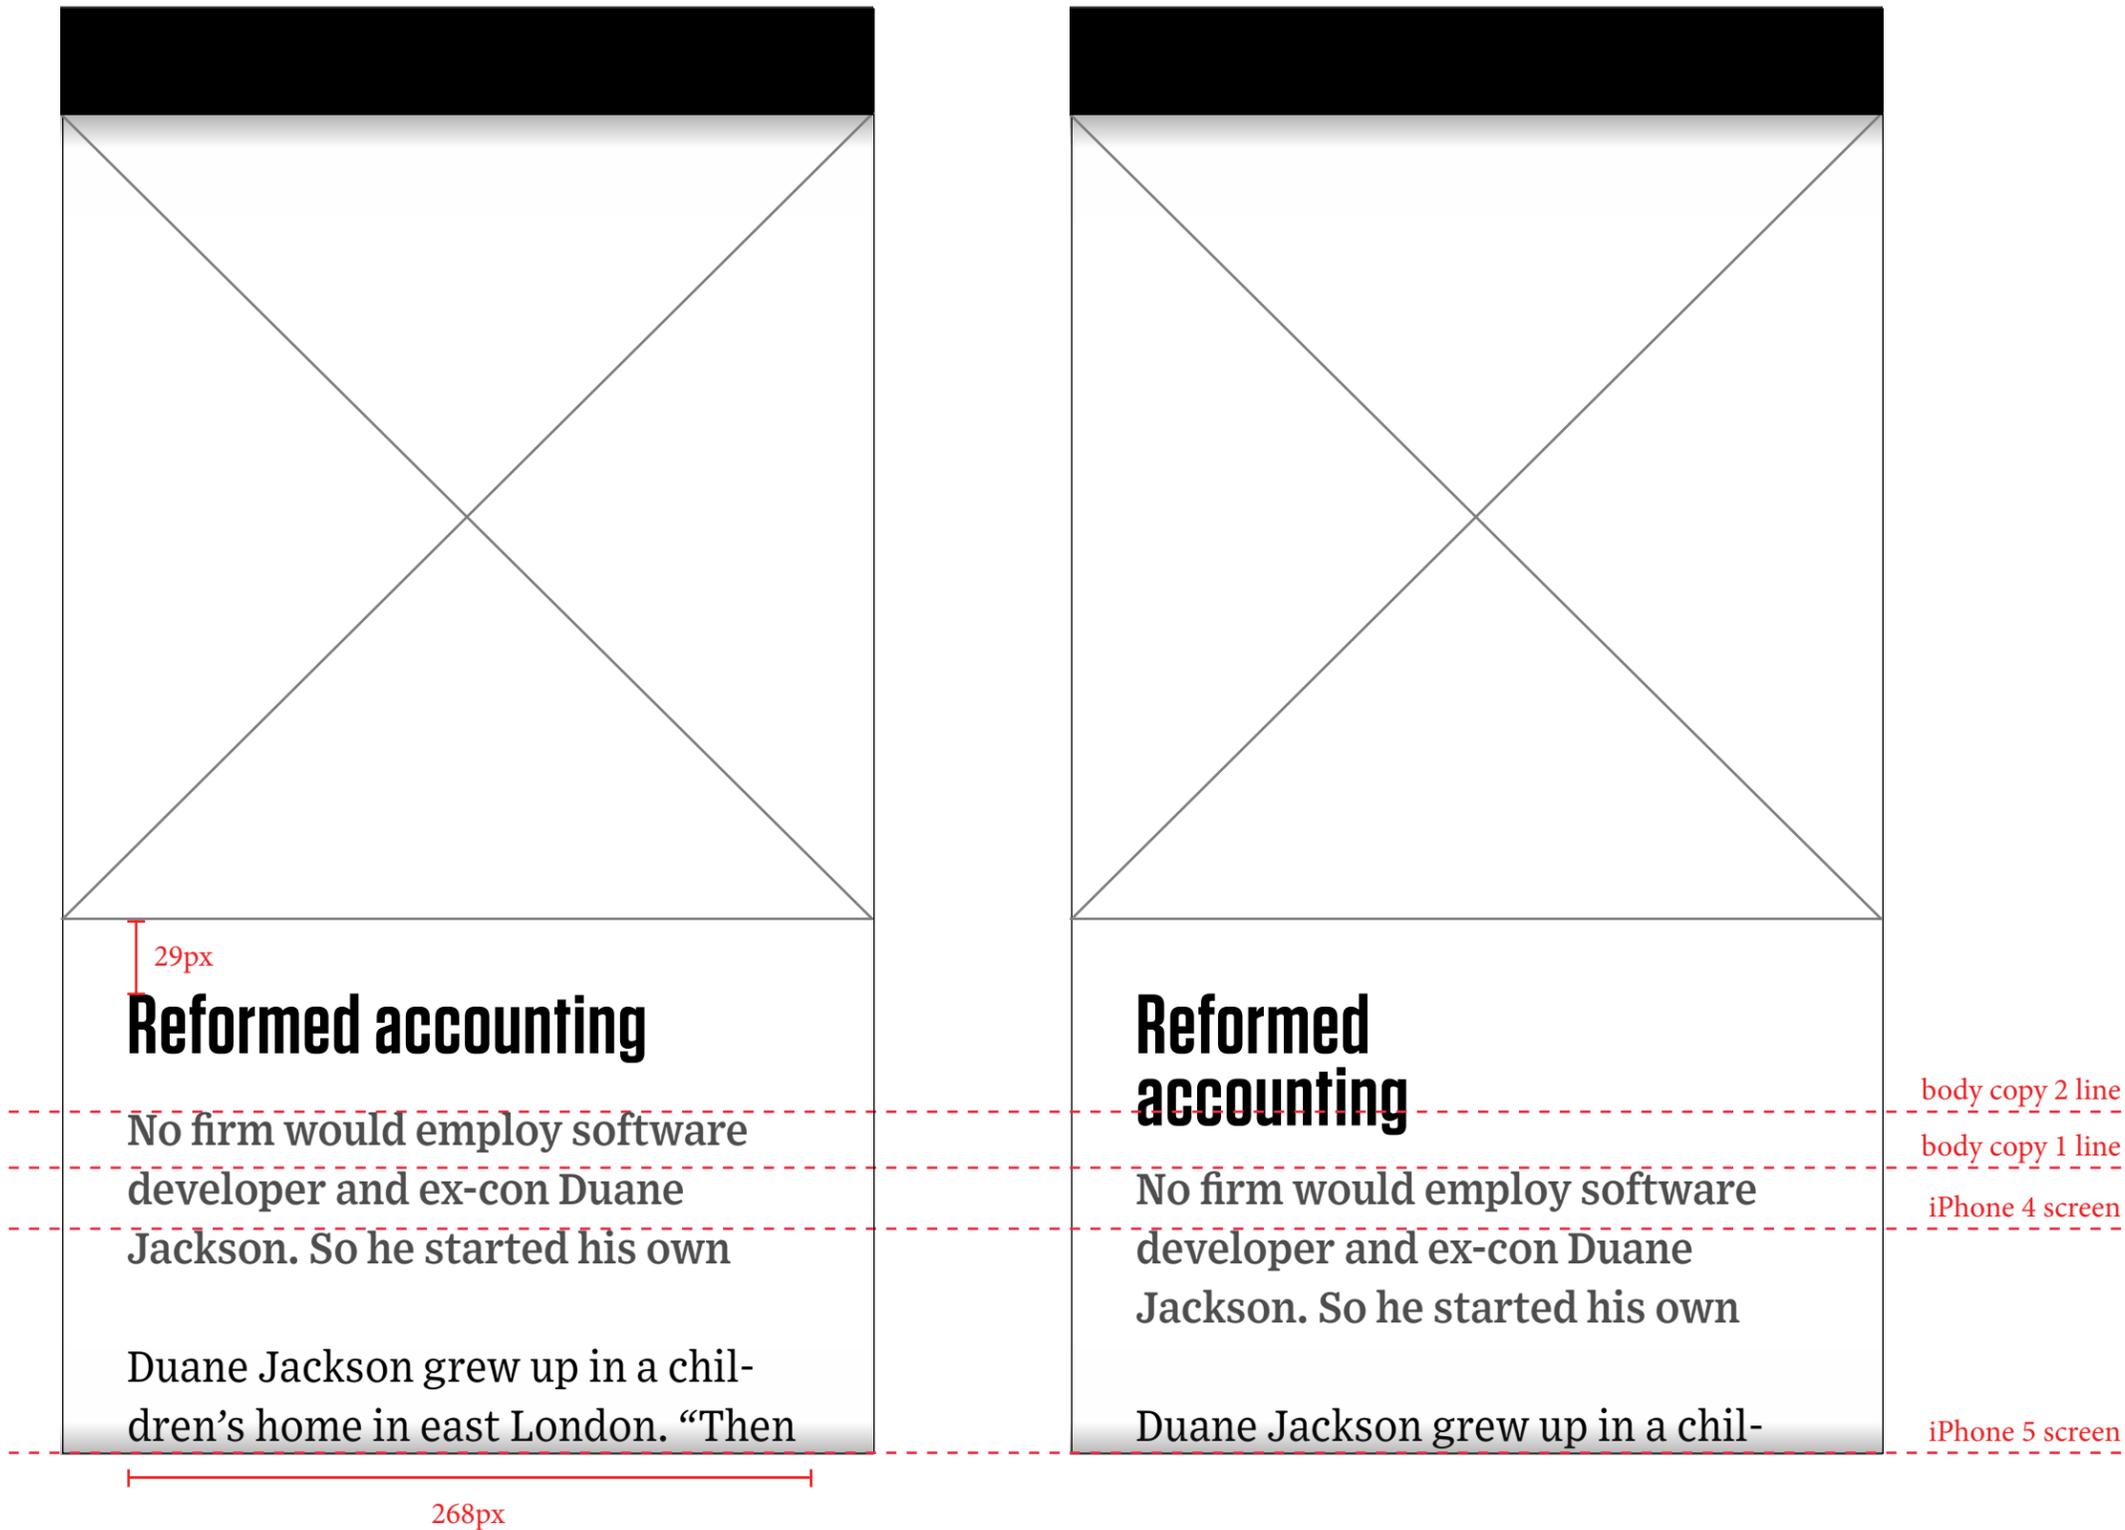

Caption:
 Exchange Web Semibold
 16.5pt
 Leading: 23.25pt
 #4d4d4d

Body:
 Exchange Web Roman
 16.5pt
 Leading: 23.25pt

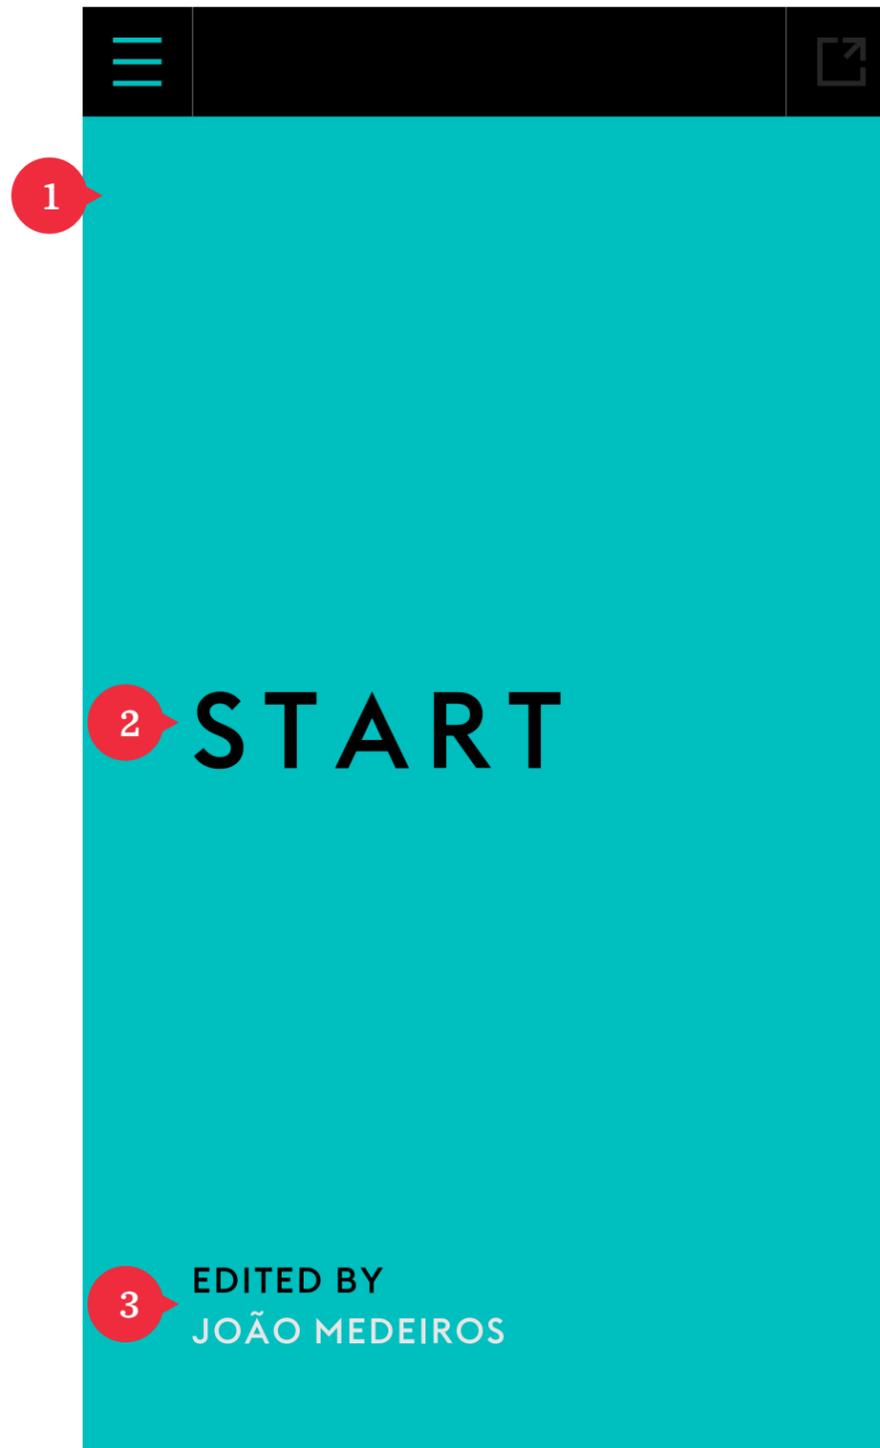

NOTES

The font sizes and the leading is designed so when the page is scrolled completely to the top, no text should be cut off. This applies for both the iPhone 4 and 5 screens.

When the title expands to 2 lines, the Caption text starts at the 2nd line.

(2.0)

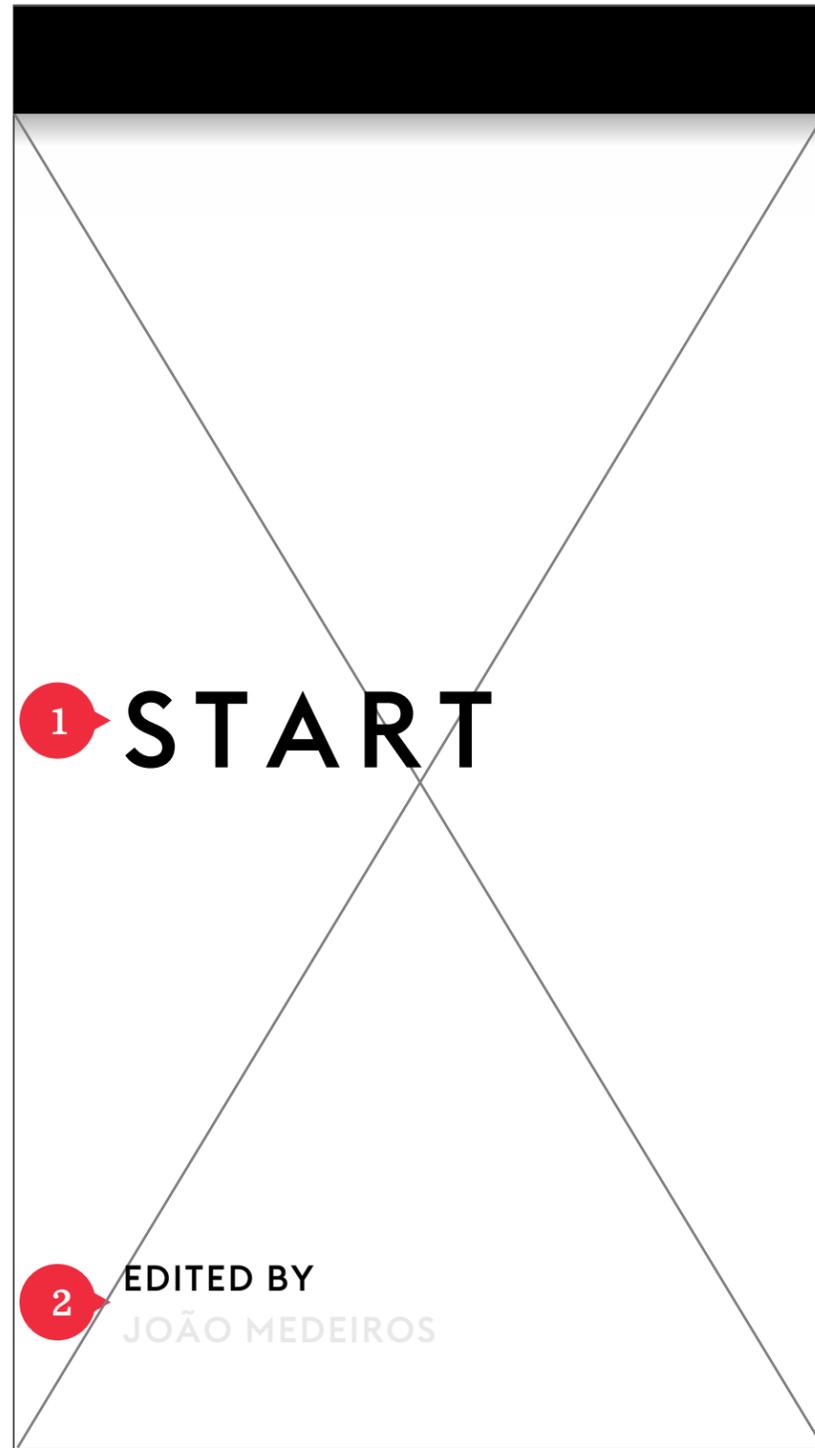

NOTES

The main purpose of this template is to introduce a new section.

However, this template can be used for full screen images as well.

- 1 Background**
The color used is associated to the upcoming section (used in the menu as well). A background image can be used as well.
- 2 Section Title**
Title of the section goes here.
- 3 More Information**
A brief caption of more information on the following section.

This moves up accordingly for the iPhone 4 screen size.

NOTES

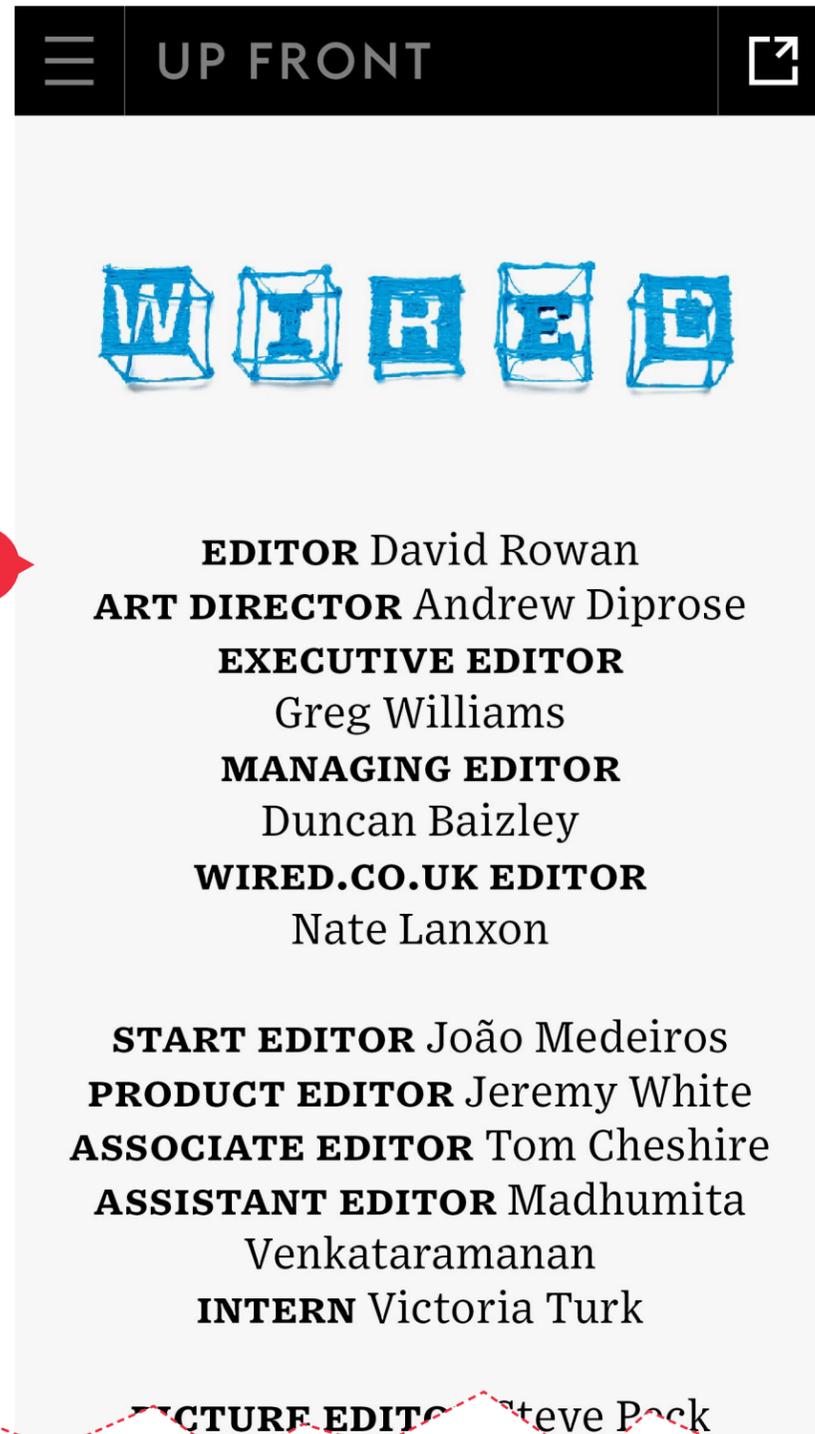

1 Section Title:

**Euclid
Medium
41.09pt**

2 Caption:
EUCLID MEDIUM
14pt

 Mavericks is the most wind-

resistant tent in the world, capable

2 **Exchange Web Bold**
 16.5pt
 Leading: 23.25pt

Exchange Web Semibold
 16.5pt
 Leading: 23.25pt
 #b2b2b2

FORM 1

The Form 1 is unique among low-cost 3D printers for its use of stereolithography, a printing technique

popular with industrial machines, but previously too expensive for desktop printers. It prints by drawing a laser across a tray of liquid photosensitive resin,

4 **EXCHANGE WEB BOLD**
TEXT-TANSFORM: UPPERCASE;
16.5PT
LEADING: 23.25PT

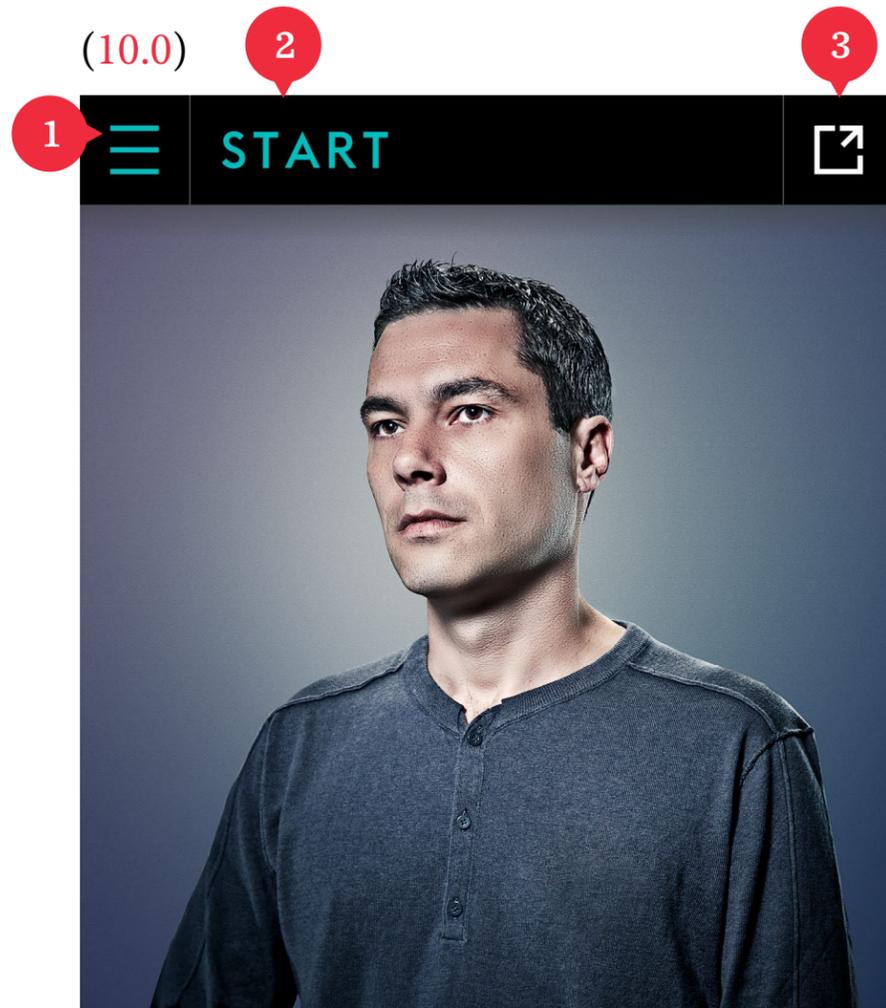

Time to print bracelet 2h 5m
 Material used 19ml clear resin

5 **Exchange Web Semibold**
 16pt
 Leading: 23.25pt

NOTES

In addition to the paragraph styles listed in the other pages, there are these ones as well.

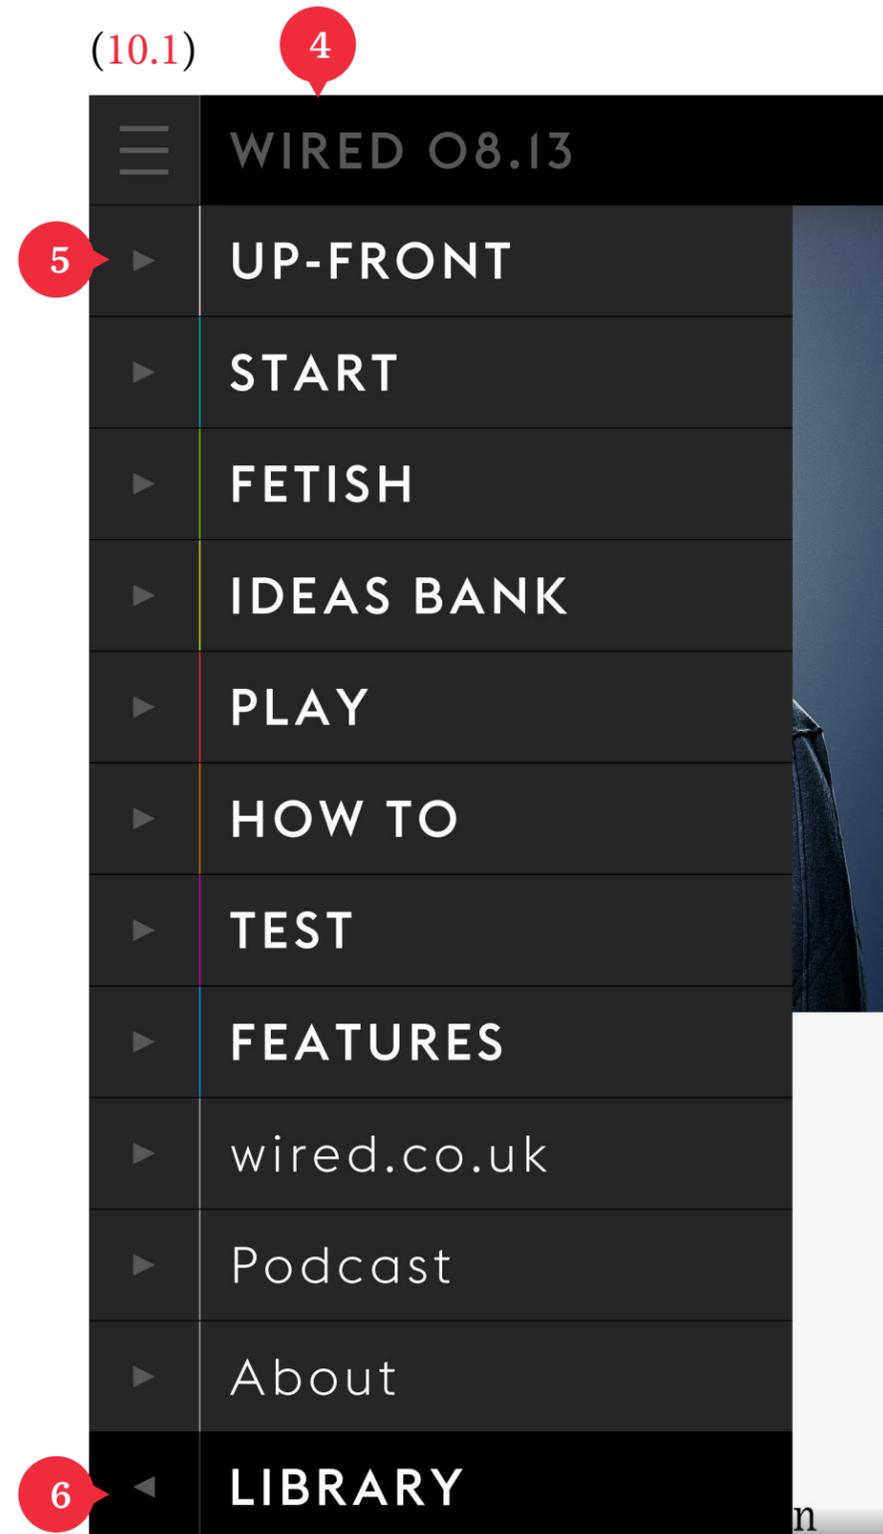

3 **Paragraph image**
 Some paragraphs have a small image floating to the left of the text, including the paragraph title.

Reformed accounting

No firm would employ software developer and ex-con Duane Jackson. So he started his own

Duane Jackson grew up in a children's home in east London. "Then

NOTES

(10.0)

The navigation bar remains at the top.

- 1 The top left button opens up the menu, shown in (10.1).
- 2 The section title appears here, as the color of the section as well.
- 3 The top right button opens up the share options (pg. #17).

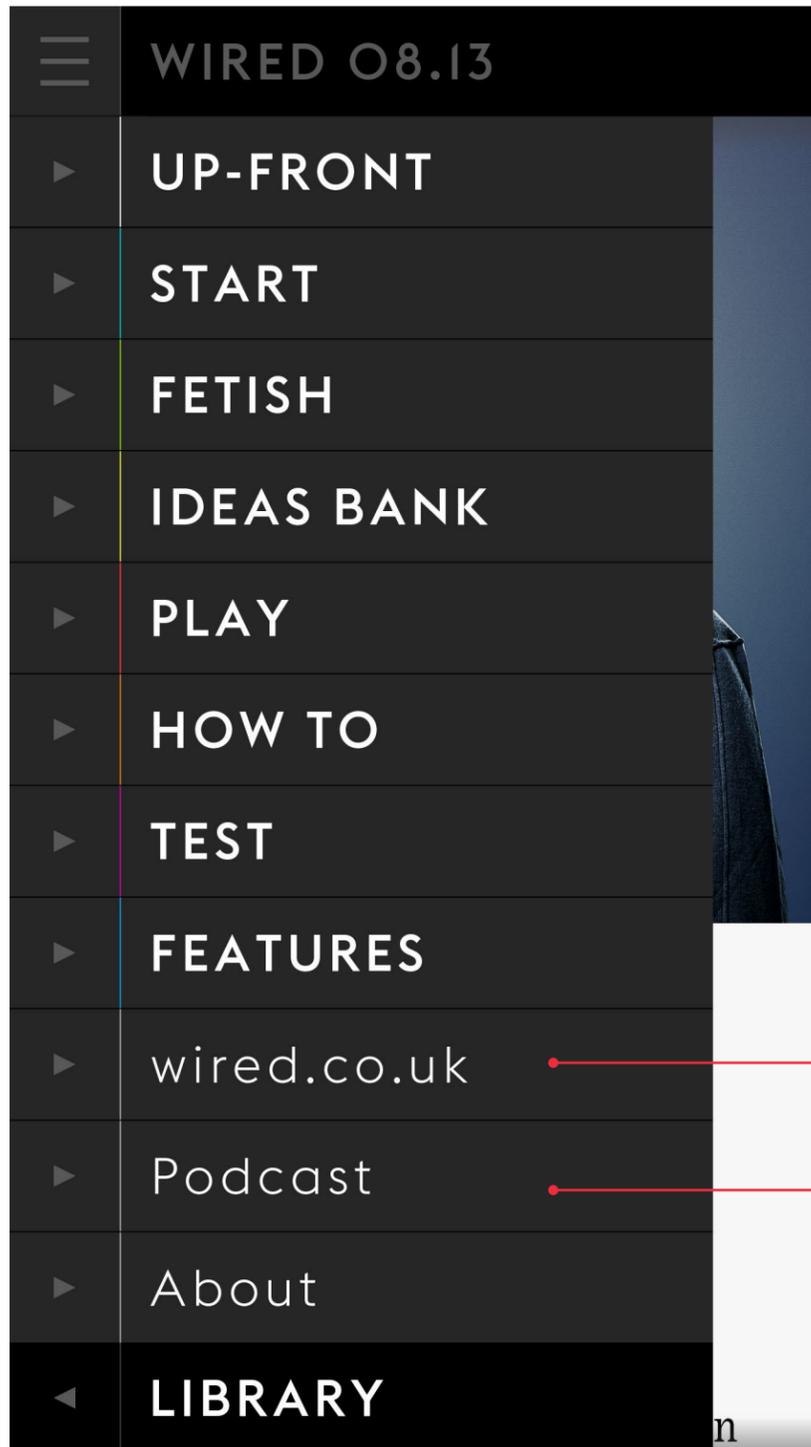

(10.1)

When the user taps 1, the menu will slide down from the top.

- 4 The information on the black bar where it had the section title (START in (10.0)) is replaced with the name and date of the current issue.
- 5 Each section of the magazine is collapsed each time the user opens up the menu.

There is a thin line beside the section title that represents the color of that section.
- 6 This button that takes the user back to the DPS Library stays at the bottom of the screen regardless if any sections are collapsed/expanded.

(10.2)

(10.3)

NOTES

(10.2)

Tapping on a title will expand out that section to reveal the articles within that section.

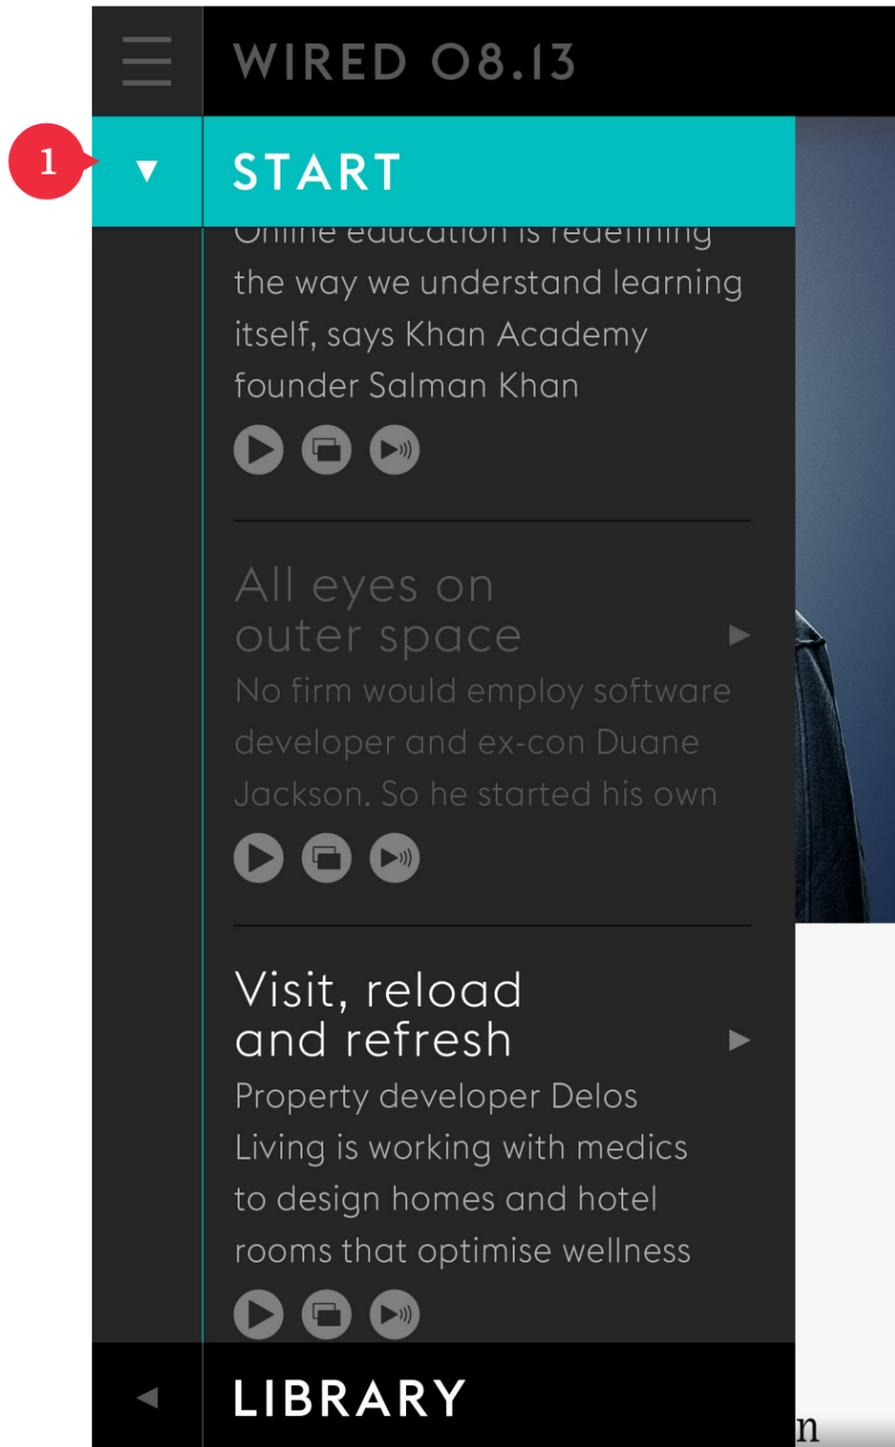

- Section Title**
To keep consistent with the menu bar sliding down from the top, as the section title bar is tapped, the color associated with that section should fill the bar starting from the top down. The letters of the title should also be filling in white as the color comes down. As this happens, the arrow on the left should animate rotating pointing down to indicate it is open. It also turns white.

- Articles**
As the section expands, the sub-menu of the articles should slide down from the top, pushing the section titles underneath down.

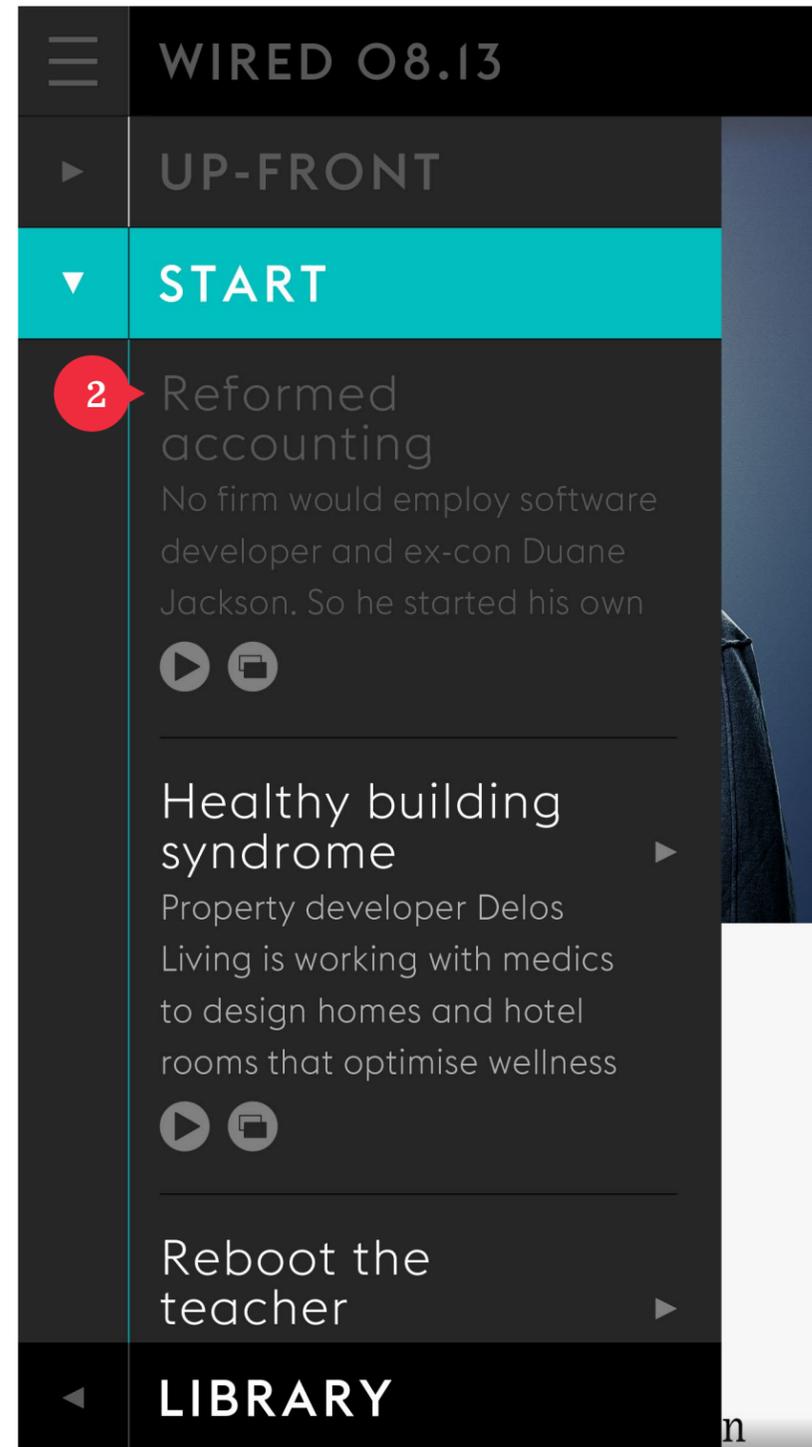

(10.3)

- Pressed State of an Article**
As a user taps an article, the text turns grey and then the menu disappears back up (reverse from how it slid down) and the page refreshes to that article.

(10.3)

(10.4)

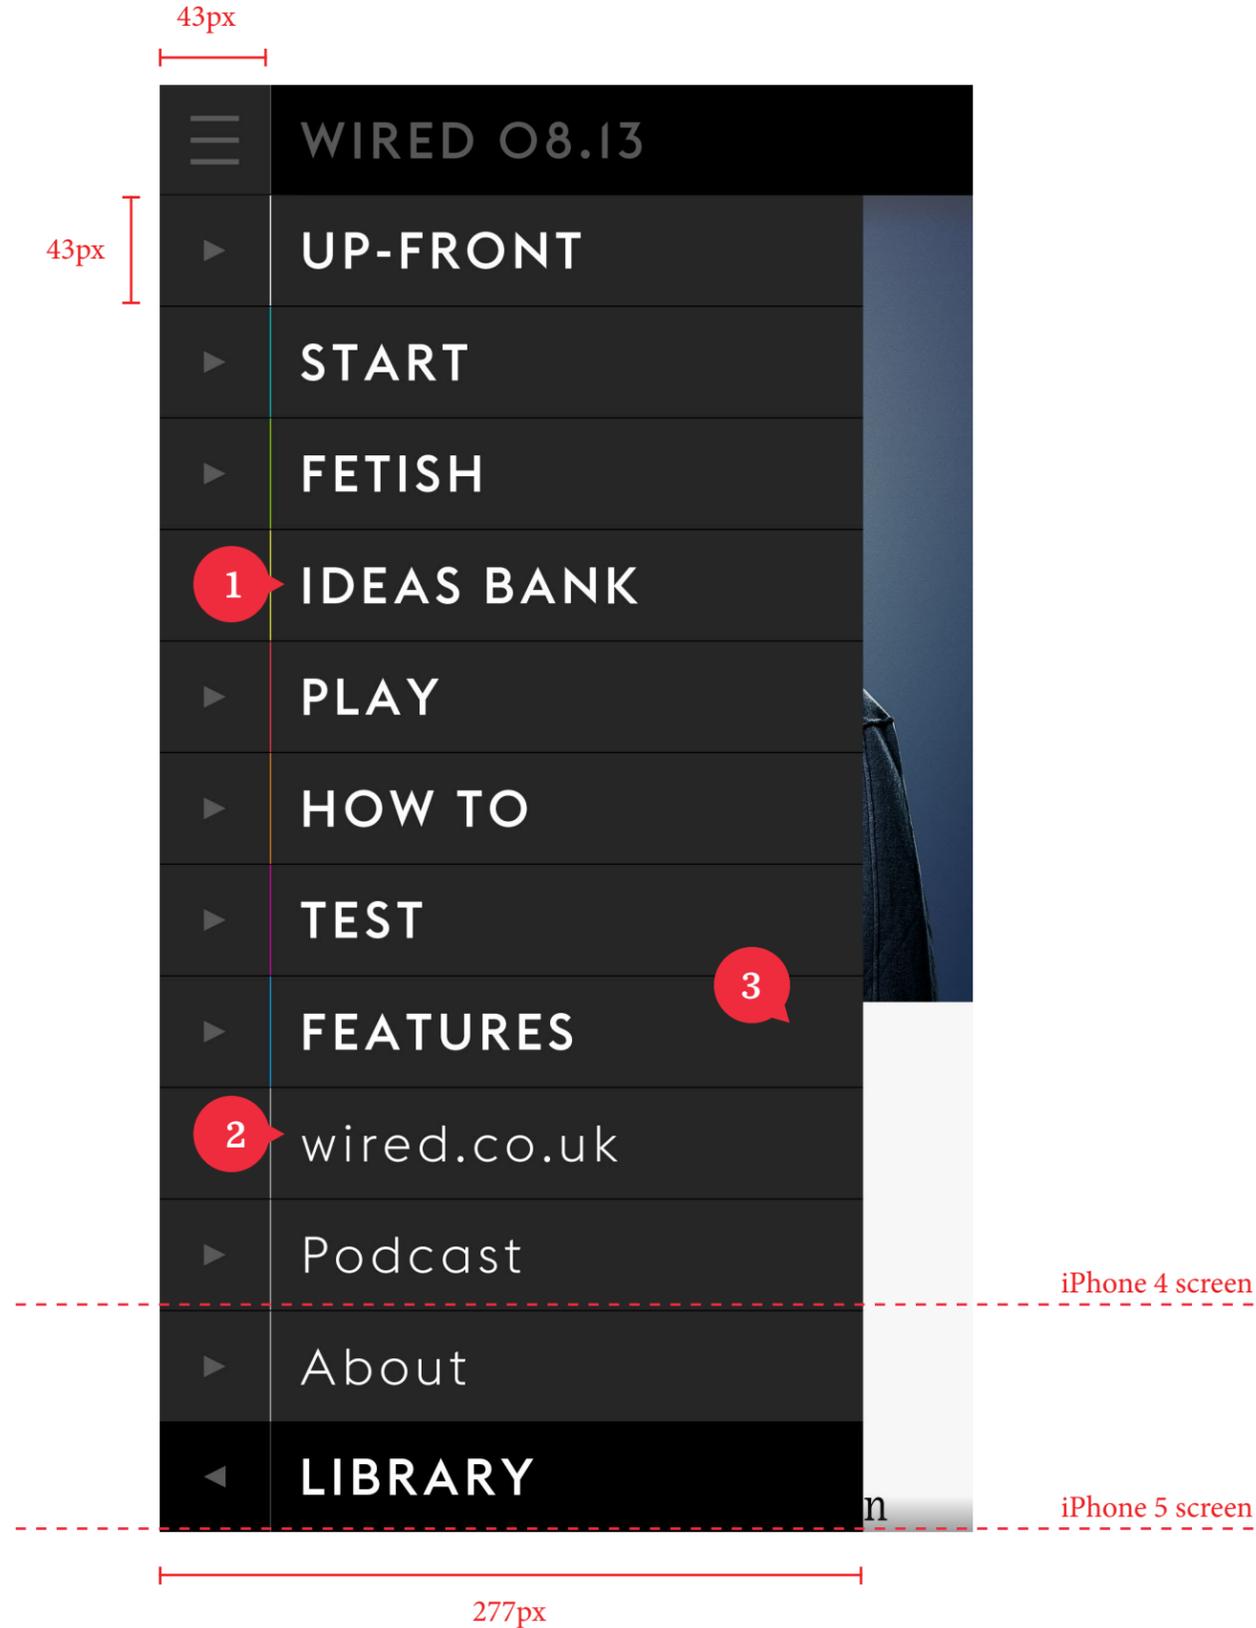

NOTES

(10.3)

- 1 **Scrolling**
As the section gets scrolled up, it pushes the section titles above it under the navigation bar and the current title bar the user is scrolling through stays fixed at the top. The user can tap the section title bar to close the section (reverse transition of how it was opened).

(10.4)

- 2 **Pressed State of an Article**
When a user opens the menu back up again and scrolls through the menu, the article they are currently viewing should be indicated by the greyed out text as well. The arrow on the right disappears.

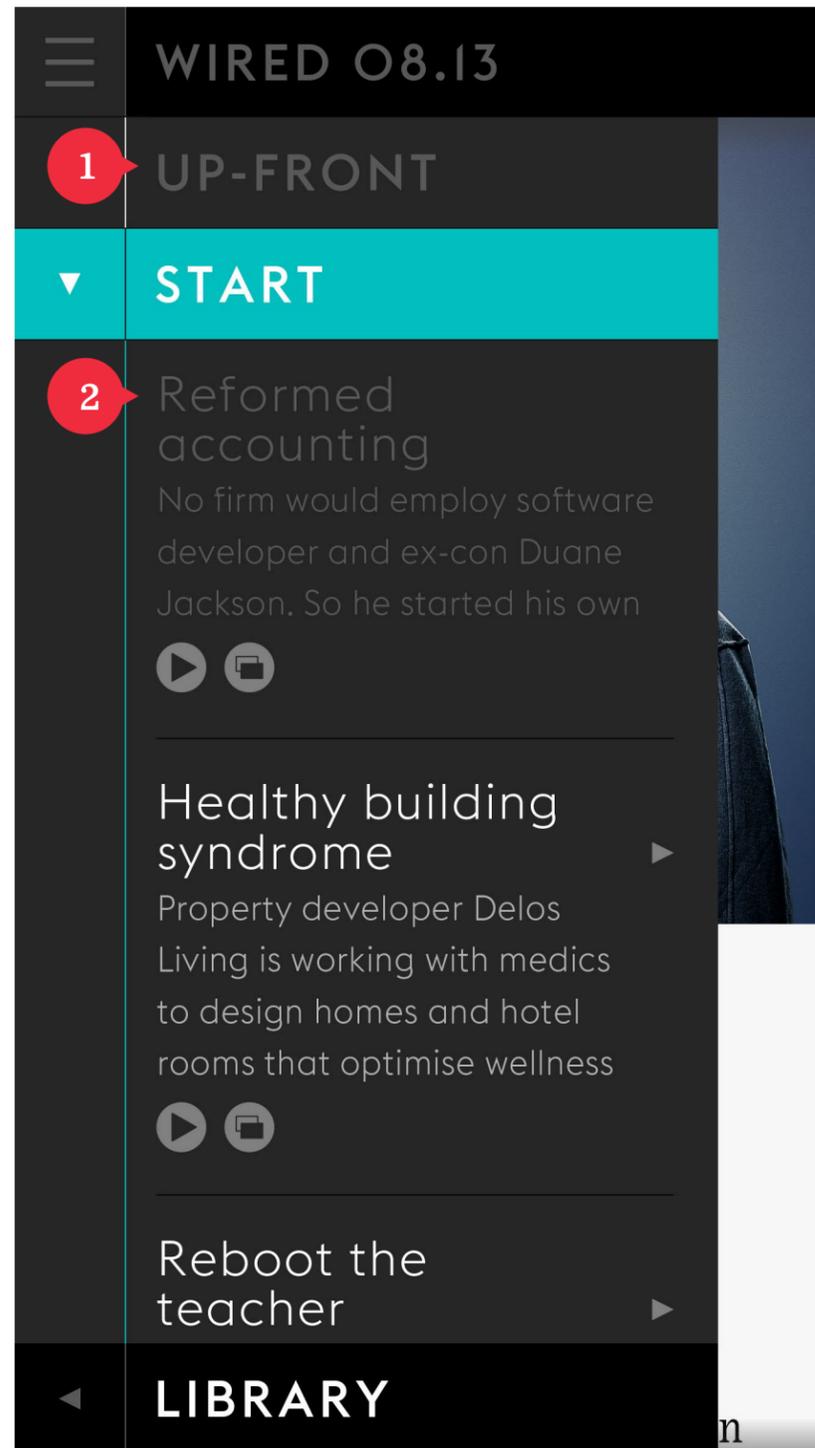

NOTES

1 Section Title:

NOTES

1 Share Icon
The share button remains at the top right of the navigation bar at all times.

2 Share Options
When **1** is tapped, the list of options a user can share the article to slides down, same animation of how the menu navigation slides down.

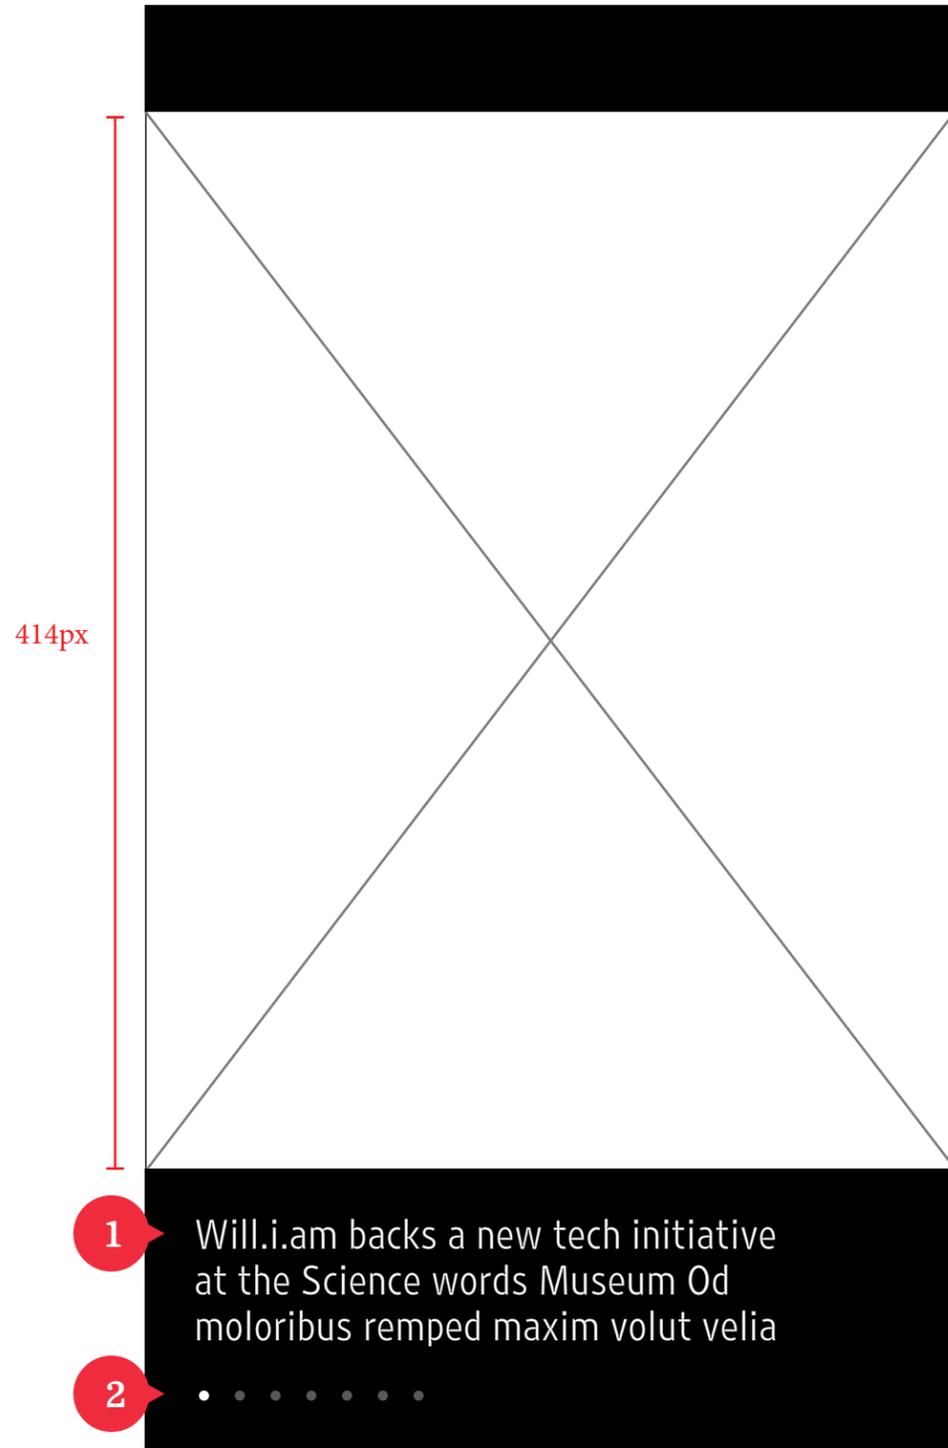

The options are Facebook, Twitter, Google+, Pinterest and Email.

(12.0)

NOTES

- 1 Navigation Bar**
The navigation bar is slightly visible but not interactable when an image gallery is opened.
- 2 Image**
The image takes the full width. Image gallery only supports portrait orientation. User swipes to view other images in the gallery.
- 3 Caption**
Brief description explaining the current image.
- 4 Image Indicator**
These dots show how many images there are in this gallery and the brighter dot is the location of the current image you are viewing.

NOTES
